

ERPNext

Open-source ERP with published, tiered pricing.

OPEN SOURCE

CLOUD OR ON-PREMISE

BEST FOR SMES

About the platform

ERPNext is a full open-source ERP covering accounting, inventory, CRM, manufacturing and HR in one system. There are no perpetual licence fees — you pay Gegohub for implementation, hosting and support, sold in four published tiers from Starter to Enterprise.

Why businesses choose it

- Fully integrated ERP platform, no perpetual licence costs
- Scalable — start on Starter, grow into Enterprise without switching systems
- Cloud or on-premise deployment
- Local implementation, support and M-Pesa integration built in

Modules & packages

Core financials, sales, purchasing, inventory, CRM and basic reporting from the Starter tier; manufacturing, quality management, multi-company and workflow automation are added as you move up tiers.

Pricing

Pricing factor	ERPNext
Pricing model	Fixed local tiers — Starter / Business / Professional / Enterprise
Starting price	KES 150,000 implementation + KES 100,000/yr support (Starter)
Additional user	KES 2,500 per user/year
Deployment	Shared cloud (Starter) up to dedicated server (Enterprise)

Publicly reported pricing, shown for context — actual local quotes depend on modules, users and deployment. Request an exact quote at gegohub.com/contact.html.
