

NetSuite ERP

Cloud ERP for multi-subsidiary, multi-currency operations.

CLOUD-NATIVE

MULTI-SUBSIDIARY

MID-MARKET+

About the platform

Oracle NetSuite is a cloud ERP built for businesses that have outgrown entry-level accounting software and need consolidated reporting across multiple subsidiaries, currencies and legal entities.

Why businesses choose it

- True multi-subsidiary, multi-currency consolidation out of the box
- Real-time visibility across finance, inventory and CRM in one system
- SuiteCommerce option unifies online and in-store retail
- Backed by Oracle's scale, roadmap and ecosystem

Modules & packages

Core financials and inventory, plus optional SuiteCommerce (e-commerce), SuitePeople (HR), Planning & Budgeting and multi-subsidiary consolidation — licensed per module.

Editions & variants

NetSuite is sold in size-based editions plus optional add-ons rather than one fixed product. The breakdown above is representative starting pricing across editions — the table below shows how cost and scope actually scale.

Full pricing breakdown below, edition by edition — not just the starting price. Publicly reported global pricing, shown for context; actual local quotes depend on modules, users and deployment.

NetSuite ERP — continued

01 Starter / Limited Edition

Small businesses outgrowing entry-level accounting software — company size: ~10 users; deployment: Cloud (multi-tenant SaaS).

PRICING MODEL	Base platform fee + per-user subscription
TYPICAL ANNUAL COST	\$12,000 – \$60,000/year
PER-USER RANGE	Not published separately by edition — NetSuite prices per-user the same across editions (\$99–\$199/user/month); editions mainly differ in scope and annual cost, not seat rate
TYPICAL IMPLEMENTATION	\$25,000 – \$35,000
TYPICAL TCO	~\$55,000+ total first-year cost (10-user, single-entity)
TYPICAL TIMELINE	3–4 months for financials-only builds; longer with more modules

02 Mid-Market Edition

Growing companies needing full financials, inventory and CRM in one system — company size: ~11–100 users; deployment: Cloud (multi-tenant SaaS).

PRICING MODEL	Base platform fee + per-user subscription
TYPICAL ANNUAL COST	\$120,000 – \$300,000+/year
PER-USER RANGE	Not published separately by edition (see Starter row)
TYPICAL IMPLEMENTATION	\$45,000 – \$90,000
TYPICAL TCO	Not independently sourced as a distinct figure — see typical annual cost above (\$120K–\$300K+/year)
TYPICAL TIMELINE	4–6 months (distribution/retail); 6–9 months (manufacturing/SaaS)

03 Enterprise Edition

Large organisations with complex processes and high transaction volumes — company size: 100+ users; deployment: Cloud (multi-tenant SaaS).

PRICING MODEL	Base platform fee + per-user subscription, custom-quoted
TYPICAL ANNUAL COST	Custom quote — typically well above Mid-Market
PER-USER RANGE	Custom quote — no public per-user rate at this tier
TYPICAL IMPLEMENTATION	\$120,000 – \$150,000+
TYPICAL TCO	Not yet sourced as a distinct TCO — subscription alone commonly \$175,000–\$250,000+/year at this tier, excluding implementation
TYPICAL TIMELINE	6–9 months; multi-entity global rollouts can exceed 12 months

NetSuite ERP — continued

04 OneWorld (add-on)

Businesses operating multiple subsidiaries, currencies or countries — company size: Any size with 2+ entities; deployment: Add-on to any edition.

PRICING MODEL	Per-subsidiary add-on to any edition
TYPICAL ANNUAL COST	+\$500 – \$1,000/month per subsidiary
PER-USER RANGE	N/A — priced per subsidiary, not per user (see annual cost above)
TYPICAL IMPLEMENTATION	\$50,000 – \$100,000+ for multi-entity/global rollouts
TYPICAL TCO	~\$110,000 – \$170,000+ total first-year cost (10 users, multi-subsidiary)
TYPICAL TIMELINE	~9 months average; large international rollouts can exceed a year

05 SuiteSuccess (industry editions)

Pre-configured onboarding for a specific vertical — manufacturing, wholesale distribution, software/SaaS, retail, nonprofit and more — company size: Any size; deployment: Cloud.

PRICING MODEL	Bundled into implementation, not separately licensed
TYPICAL ANNUAL COST	Bundled into implementation, not separately licensed
PER-USER RANGE	N/A — bundled into the implementation package
TYPICAL IMPLEMENTATION	\$25,000 – \$75,000 depending on industry edition and module count
TYPICAL TCO	Not yet sourced as a standalone figure — rides on whichever base edition it's paired with
TYPICAL TIMELINE	~3–4 months (100–120 days) from kickoff to go-live
